Medical certificate for an outside school hours care licence application

Child care licence applicant

The person seeking a medical certificate is currently applying for an outside school hours care licence.

If approved, the person (the applicant) applying for the licence will be directly responsible for the effective supervision and control of a child care service for groups of school age children.

Medical certificate

As one part of a rigorous application process, the Department for Communities needs details of the applicant's health to make a proper assessment of his/her ability to effectively care for children.

A medical certificate is therefore requested giving the date the applicant's medical records began with your practice, plus a statement on the applicant's **physical and mental health** in relation to his/her ability to effectively supervise and care for young school age children.

Of specific importance to the Department when considering licence applications is the person's mental wellbeing and possible dependence on medication(s) or substance(s) that may negatively impact on the quality of care provided to young children. It is requested therefore, if the applicant has a medical condition, disability and/or is on any regular medication(s) or known substance(s) that may negatively impact on the quality of care provided that this be duly considered and reported on as accurately as possible. Additionally, if there are any measures that may be put in place to overcome the considered negative impacts of the applicant's medical condition, disability and/or dependence on medication(s) or known substance(s) that this also be described.

Further enquiries

If you have any enquiries about the above medical certificate, please telephone the Department for Communities on 08 6210 3333 (Metro) or 1800 199 383 (Freecall STD).
