

UNIFEM Australia Perth Chapter invites you to attend: Ending Violence Against Women International Perspectives

UNIFEM Australia acknowledges the support of the Australasian Council of Women and Policing and AusAID

Violence against women is a serious global problem, affecting all countries around the world, including Australia. It is a violation of basic human rights and causes immeasurable trauma to women, families and the community.

Responding to and preventing violence against women requires a concerted response involving the combined actions of national governments, non-government organisations and civil society, international donors and multilateral organisations, and men and women in the community. This seminar will give you the opportunity to meet and hear from two international experts in the field of violence prevention.
